

SYED JUNAID

Data Analyst | Python | SQL | Power BI | ETL

Bengaluru, Karnataka | +91 7204777042 | syedjunaid3786@gmail.com | github.com/mjunaid777 | [Add LinkedIn URL]

PROFESSIONAL SUMMARY

Aspiring Data Analyst pursuing a BCA at Bangalore University (expected 2026) with hands-on experience building end-to-end ETL pipelines, SQL data warehouses, Power BI dashboards, and Python-based analytics solutions. Skilled in data cleaning, data visualization, statistical analysis, and business intelligence reporting, with a track record of transforming large, complex datasets into actionable business insights. Seeking an entry-level Data Analyst or Data Engineering role.

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Databases:** PostgreSQL, SQLite
- **Data Visualization & BI:** Power BI (DAX, Data Modeling, Dashboard Development), Excel (Power Query, Pivot Tables, XLOOKUP, VLOOKUP, Conditional Formatting)
- **Python Libraries:** Pandas, NumPy, Matplotlib, openpyxl, Scikit-learn
- **SQL:** Joins, CTEs, Window Functions, Subqueries, Views
- **Data Engineering:** ETL Pipelines, Star Schema, Data Warehousing, Data Cleaning, Data Integrity
- **Analytics:** Statistical Analysis, KPI Tracking, Business Intelligence, Predictive Modeling
- **Tools:** Jupyter Notebook, VS Code, Git, GitHub

EXPERIENCE

Data Analytics Virtual Intern | Tata Group (via Forage) | Feb 2026 – Apr 2026

- Executed a comprehensive corporate data analytics simulation, fulfilling targeted business requests for e-commerce revenue analysis and operational forecasting.
- Developed interactive data visualization reports to translate raw transactional datasets into clear, executive-ready performance metrics.
- Synthesized technical findings into a professional internship log book, effectively communicating data-driven business recommendations to simulated corporate stakeholders.

PROJECTS

Enterprise AML & Financial Fraud Data Platform | Python, PostgreSQL, Pandas, Power BI

- Built an end-to-end, scalable ETL pipeline processing 5M+ financial transactions, performing ingestion, validation, and warehousing.
- Designed a PostgreSQL star schema data mart using SQL window functions; optimized data transformations with Pandas memory chunking to improve pipeline efficiency.
- Developed an interactive Power BI fraud analytics dashboard that identified high-risk transactions, improving data visualization for stakeholders and reducing investigation noise.

AI-Powered Customer Support Analytics Pipeline | Python, PostgreSQL, Llama 3.1 API, SQL, Power BI

- Developed an automated analytics pipeline processing 8,400+ customer support tickets using Python and AI-powered sentiment analysis.
- Integrated the Llama 3.1 API to classify sentiment and root causes, storing enriched data in PostgreSQL using SQL CTEs to maintain data integrity.
- Built a Power BI dashboard tracking regional hardware defect trends and KPIs to support faster, data-driven operational decisions.

Automated Python Reporting Pipeline | Python, SQLite3, smtplib

- Automated daily retail reporting using Python, SQLite, Pandas, and SMTP, eliminating manual report preparation.
- Generated formatted Excel reports directly from transactional databases for consistent, error-free output.
- Enabled automated daily stakeholder distribution, improving reporting turnaround and data accuracy.

EDUCATION

Bachelor of Computer Applications (BCA)

Bangalore University | Expected Graduation: 2026

CERTIFICATIONS

- Python for Data Analysis — Certificate Code: 8956616 (September 2025)
- Power BI for Beginners — Certificate Code: 8961596 (September 2025)
